

INTERNATIONAL COURSE IN MICROBIAL ECOLOGY

Hands-on training in Prokaryotic and Eukaryotic metagenomics

6 -10 May 2019, Milano, Italy

The 10ICME is a practical course addressed to 30 PhD students and young researchers from all over the world interested in microbial ecology and metagenome analysis.

The course focuses on:

- Metagenomic Sequencing: history, application and project planning
- Assembly, Binning and Annotation: theory and hands-on training

Participants are selected based on their CV and motivation letter. Registration fee is 420 euro/person and includes lunches and social events; free of charge for PhD students from the University of Milano-Bicocca.

Application Deadline: 12 April 19

Send 1 page CV and Motivation letter to info@microbeco.org or apply directly on the webpage
